

GAS MASTRRR SERIES 32, 32NV & 32PT HB-2, VB-2 & PB-2 CIU MOTOR SLIDE BRACKETS

HB-2, VB-2 & PB-2 CIU MOTOR SLIDE BRACKETS

The CIU motor slide brackets are designed for use with the submersible Series 32, 32NV and 32PT (3-25HP) chemical induction units.

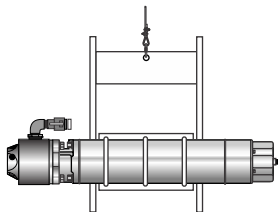

The slide brackets are constructed from 316 stainless steel materials for long term duty in harsh water, wastewater, or CSO basin installations.

The PB-2 pivoting bracket system allows the CIU to easily lower in a vertical position without binding to the guide rail stop bolts and slowly pivot to a horizontal position. The CIU is normally mounted in the bracket to discharge chemical into the flow, but can be reversed to discharge with the flow for required applications.

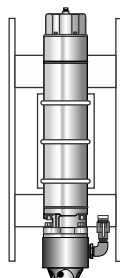

The CIU motor slide brackets are supplied with 316 stainless steel wire rope lifting cables and U-Bolts for easy installation with GR-2 guide rails and lift Davit Cranes. CL-1 hose/cord clamps attach to the lifting cable to secure FX-1 flex hose and power cable in high velocity flows.

32 & 32NV SLIDE BRACKETS

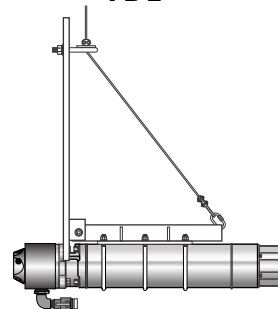

**HORIZONTAL
HB-2**

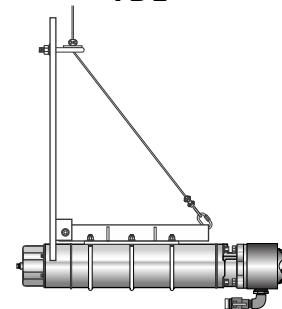

**VERTICAL
VB-2**

**PIVOTING FORWARD
PB-2**

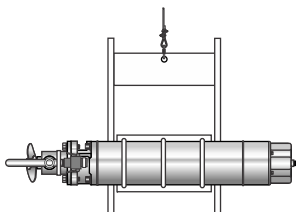

**PIVOTING REVERSED
PB-2**

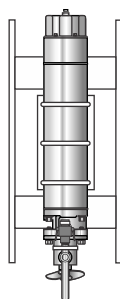

32PT SLIDE BRACKETS
